

Calf Implants

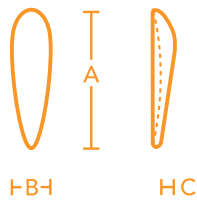

sientra.

Calf Implants

Sientra calf implants are used in cosmetic surgery, as well as in reconstructive surgery to correct unevenness or irregularities of the calf, such as those caused by congenital malformation, neurological diseases, or trauma. They are composed of a silicone elastomer envelope and are available in two types: Symmetrical and Asymmetrical.

Asymmetrical Calf Implant

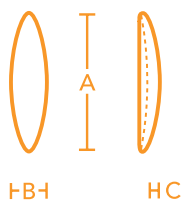

Smooth Surface

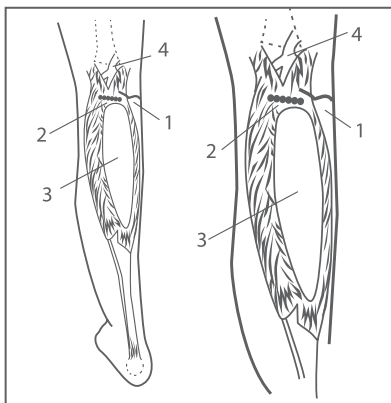

DIMENSIONS				REFERENCE
A cm	B cm	C cm	VOL cc	
15.0	4.7	1.5	70 cc	412-150
19.7	5.4	1.9	125 cc	412-200
23.5	5.8	1.9	175 cc	412-230

Symmetrical Calf Implant

Smooth Surface

DIMENSIONS				REFERENCE
A cm	B cm	C cm	VOL cc	
6.6	2.7	1.2	15 cc	402-065
9.9	3.1	1.5	30 cc	402-100
15.8	3.1	1.6	50 cc	402-160
19.1	3.2	1.8	70 cc	402-190
26.2	4.2	2.4	140 cc	402-260
26.9	3.6	1.9	105 cc	402-270
